#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 7 recites the limitation "the now first antenna arrangement" in line 2. There is insufficient antecedent basis for this limitation in the claim. Does it mean "a first antenna arrangement"?

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-4, 6-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Thiel et al (US Patent 6,034,638), cited by applicant.

Thiel et al disclose, in figure 3, an antenna system comprising a transceiver 78, a first antenna arrangement (52,54), a second antenna arrangement (56,58), wherein each antenna element (52,54,56,58) is respectively coupled to each switching element (64,66,68,70). The patent to Thiel et al so teaches that the monopole antenna elements (52,54,56,58) can be switched by switching elements (64,66,68,70) so that one or more is active, with the others acting as parasitic directors/reflectors, see abstract. The antenna elements are quarter wavelength monopole elements, column 5, lines 29-32.

***Allowable Subject Matter***

Claims 5 and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

Applicant's arguments filed on 06/01/2006 have been fully considered but they are not persuasive. The applicant asserts that the applicant's antenna arrangement includes "two antenna arrangements with comprising two mono-pole antenna each" in page 9. However this limitation does not include in the claims.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
